

# The 28th International Symposium on High-Performance Parallel and Distributed Computing

Phoenix, AZ, USA, June 24-28, 2019

Held in conjunction with ACM Federated Computing Research Conference

## GENERAL CHAIR

Jon Weissman, University of Minnesota

## PROGRAM CO-CHAIRS

Ali R. Butt, Virginia Tech

Evgenia Smirni, College of William & Mary

## LOCAL CHAIR

Ming Zhao, Arizona State University

## STEERING COMMITTEE

Franck Cappello, ANL & INRIA

Peter Dinda, Northwestern University

Salim Hariri, University of Arizona

Dean Hildebrand, IBM Research Almaden

Adriana Iamnitchi, Univ. of South Florida

Alexandru Iosup, Delft Univ. of Technology

Jack Lange, University of Pittsburgh

Arthur Maccabe, Oak Ridge National Lab

Manish Parashar, Rutgers University

Kenjiro Taura, The University of Tokyo

Michela Taufer, University of Delaware

Douglas Thain, University of Notre Dame

Jon Weissman, University of Minnesota

Dongyan Xu, Purdue University

## DEADLINES

- Abstracts due: **January 16, 2019**
- Papers due: **January 23, 2019**
- Author notifications: **March 25, 2019**
- Camera ready: **April, 2019**
- Conference dates: **June 24 - 28, 2019**

**MORE INFO** <http://www.hpdc.org/2019>

## OVERVIEW

The ACM International Symposium on High-Performance Parallel and Distributed Computing (HPDC) is the premier annual conference for presenting the latest research on the design, implementation, evaluation, and the use of parallel and distributed systems for high-end computing. The 28th HPDC will take place in Phoenix, AZ in June 2019 as part of FCRC

## SCOPE AND TOPICS

Submissions are welcomed on high-performance parallel and distributed computing (HPDC) topics including but not limited to: clouds, clusters, grids, big data, massively multicore, and extreme-scale computing systems. Experience reports of operational deployments that provide significantly novel insights for future research on HPDC applications and systems will also receive special consideration.

In the context of high-performance parallel and distributed computing, the topics of interest include, but are not limited to:

- Operating systems, networks, and architectures
- High performance runtime environments
- Massively multicore systems, including heterogeneous systems
- Datacenter technology, resource virtualization
- Programming languages, APIs, and system inter-operation approaches
- File and storage systems, I/O, and data management
- Big data stacks and big data ecosystems
- Resource management and scheduling, including energy-aware techniques
- Performance modeling, analysis, and engineering
- Fault tolerance, reliability, and availability
- Operational guarantees, risk assessment and management
- Emerging application areas that include cloud/edge computing and IoT

## SUBMISSION GUIDELINES

Authors are invited to submit technical papers of at most 12 pages in PDF format, including figures and references. Papers should be formatted in the ACM Proceedings Style and submitted via the conference web site. Submitted papers must be original work that has not appeared in and is not under consideration for another conference or a journal.
